

# Homework

Please create the following test automation scenarios for the attached Nenno's Pizza android application.

We are expecting a git repository with a proper Readme file which describes how we can execute the tests.

You can use real device or android emulator.

At the end of your test run please generate a report about the results.

Please use the following tech stack for your homework (You can include additional things if you want):

- Appium
- Codeceptjs - <https://codecept.io/>
- Cucumber

## Test Steps to automate

1.	<ul style="list-style-type: none"><li>• Open the Nenno's Pizza application</li><li>• Check if the Nenno's Pizza title appears on the main page</li><li>• Check if the title/contents/price of the Ricci pizza appears on the main page</li><li>• Select Ricci pizza</li><li>• Check if the name of the selected pizza / picture of the selected pizza and the Ingredients title appears on the page</li><li>• Check if the Mozzarella and Ricci ingredients are checked in the list</li><li>• Add the pizza to the cart</li><li>• Navigate back to the main page and check if the "1" appears next to the cart icon</li><li>• Open the cart and check if the selected pizza with its price appears in the cart</li><li>• Delete the pizza from the cart and check if it is disappeared</li><li>• Navigate back to the main page</li></ul>
2.	<ul style="list-style-type: none"><li>• Open the Nenno's Pizza application</li><li>• Click on the "+" button on the main page to create a custom pizza</li><li>• Add Salami, Mushroom and Ricci to the pizza</li><li>• Check if the price of your custom pizza appears on the page</li><li>• Add this pizza to the cart</li><li>• Check out the pizza</li><li>• Check if the Thank for your order appears on the page</li><li>• Navigate back to the main page</li></ul>
3.	<ul style="list-style-type: none"><li>• Open the Nenno's Pizza application</li><li>• Open the cart</li><li>• Open the Drinks menu</li><li>• Add a beer from the menu</li><li>• Go back to the cart</li><li>• Check if the beer appears in the cart</li><li>• Delete the beer and go back to the main page</li></ul>
